Custom Local Building Codes (CLBC) keep a local focus on the I-Codes your community uses the most

State or model International Codes don't always reflect amendments your municipality adopts at the jurisdiction level. Our CLBC service integrates your local amendments into any of the 15 ICC i-Codes to create a transparent, easy-to-use Custom I-Code for building and code enforcement officials.

Improve efficiency and transparency

ICC and General Code can integrate, create, publish and print your locally amended I-Codes so your staff can focus on other important business for your community.

Get customized, integrated output

We can custom publish your CLBC in several integrated formats including our premiumAccess online platform, custom books, and PDFs that provide links to your municipal code.

Digital Access to your CLBC is easy— PremiumAccess Features

Our premiumAccess platform integrates intuitive design, responsive navigation, and robust search functionality drive performance and user satisfaction. You can share licenses among municipal staff for quick and easy access to your I-Codes.
