Ensure that ordinances are always accurate, well-organized and easily-accessible to your city

Codification allows your ordinances to be gathered by topic and systematically arranged into an enforceable code of ordinances that city officials and constituents can easily reference to find and understand the current ordinances that affect your city.

What's your city's need?

Create a new code: We work closely with your city to compile your ordinances into a print and/or online code that's organized, accurate and enforceable.

Update my current code: Regular code updates help guarantee that your city always has a current, accurate and enforceable resource.

Get an Editorial & Legal Analysis: Our legal and editorial experts use their knowledge and experience to identify conflicts, inconsistencies, duplication and statutory compliance issues in your code and recommend changes.

Codification powered by Code Review brings your code to life

With a focus on the review phase of the code project, this proprietary technology connects your Franklin Legal project team and your codification stakeholders. Together you can manage the major milestones of your code project while eliminating paper reports, printed legal memorandums or Legal Workbooks.

Why codify with Franklin Legal Publishing

True Partners with a
Shared Vision
