## Boost transparency and efficiency with a flexible user experience

*eCode360*, our proprietary online code portal, is specifically designed to house codified laws and municipal information in one convenient location. *eCode360*'s flexibility meets the needs of a wide variety of users from municipal staff, to planners, to constituents. Top features include:

### Shareable Code Content

Multiple sharing options provide quick responses to questions about your code and improve transparency. Link directly to specific sections and chapters in emails, or social media.

### Robust Search Capabilities

Advanced filters help users find code information by keywords, phrases, chapters, content types and more. The Multicode tool gives users the added ability to find sample legislation and see how other communities are handling legislative topics. Our first-of-its-kind mobile app also lets you access thousands of codes in our eCode library from any smart phone.

### Empowers Active Engagement

*eCode360* is a simple, intuitive way for everyone in your community to navigate through municipal code content. Our new eCode360 API also makes it easy for municipalities and other organizations to seamlessly link to code content through their own systems and platforms.
